

18 March 2020

Dear Parents & Swimmers,

We trust you are doing well and staying healthy.

We stand by our previous communication to you whereby we **do not believe** that the virus can be transmitted in water. From the research we have done, chlorine as well as the heat of our environment kills the virus.

Please take note of **Dr Leong Hoe Nam** comments that water and chlorine within swimming pools will help to kill the virus. Further take note that the **Contagious Disease Control Department** also supports the fact that chlorine kills the virus.

We are however, respectful of your fear in this time and therefore we have made the decision to close for a 2 week period. Our closure is with the understanding that we will make up the 2 weeks lessons in lieu of payment received from you. We are committed to you our client and wish you a healthy 2 weeks.

We have decided to **close from Monday, 23rd March, 2020 up to and including the 4th April, 2020.**

Kindly note that once the school has re-opened we will make the necessary arrangements for make-up lessons at your convenience.
